What's New

1. NEW HEMEROCALLIS (Daylilies). We have been growing, hybridizing and selecting the finest varieties of hemerocallis for many years. We are now able to offer our customers a selection of the world's finest varieties. Probably no group of plants has made more rapid strides forward than these permanent, exciting and beautiful garden favorites. As we continue our testing, we will release more and more varieties each year. If you are not familiar with the new colors, shapes and types of daylilies, you are missing one of the thrills of modern gardening. **CATHEDRAL TOWERS, EVELYN CLAAR, CHLOE, JEAN, CRIMSON STAR, JEAN LAFITTE, MOROCCO RED, PAINTED LADY, SU-LIN, VALIANT, TWILIGHT TIME, and MAGNOLIA** are a few of these aristocrats.

2. NEW IRIS. We wish to call to your attention again this year, the two very fine new iris hybrids of Mrs. Leola Fraim. **BLUE STEEL** and **LAKE WALDEN** are rapidly taking their places in the iris world as two of the finest new iris available. You will notice many of the newest and finest other iris added to this section.

3. NEW DAFFODILS. Each year we add several new daffodils to our collection after they have proved themselves in the trial garden or show table. Taking its place in our catalog with the finest of today's other daffodils is the largest known double, the huge **SUNBURST** and many other new daffodil classics.

4. NEW HYACINTHS. Don't miss the new shades of yellow, salmon-pink, and the wonderful long lasting double flowered hyacinths.

5. WOOD HYACINTHS. We were deluged with orders for these wonderful and permanent beauties when we offered the new improved varieties that have just recently become available. We hope to be able to fill all orders this year.

6. NEW AND WONDERFUL LILIES. Improvement in lilies seems to know no bounds. We have tested dozens of new varieties recently and are pleased to add such a superb new lily as **JILLIAN WALLACE** to our listings. Many lily fanciers consider it the most beautiful lily in the world. Three sensational new yellow lilies of the Mid-Century strain are being introduced this year. They were one of the high lights of the American Lily Show in Boston this July. **PROSPERITY** is a cool lemon-yellow with outward facing flowers, and **CROESUS** and **DESTINY** are rich yellows with upward facing flowers. The dotting and speckling of the flowers is reduced to a minimum in these new husky easily grown lilies.

7. NEW NAMED HYBRID AMARYLLIS. For years we have tested the new hybrid Amaryllis from many sources, raising them from seed and bulbs. Finally, we are convinced that the **LUDWIG** strain, the **WARMENHOVEN** strain, and the **VAN MEEUWEN** strain are the three finest strains of hybrid named amaryllis in the world. We have had amazingly favorable reactions from the public who have seen these fabulously beautiful flowers for the first time at our horticultural exhibits or who have flowered them in their own homes. They were overwhelmed by the size, vigor and clearness of color of these amazing hybrids.

Blooming at the same time as Red Emperor, and available in a variety of shades from creamy white, through pinks, and red and yellow combinations, and with flowers of approximately the same size, these new creations bid well to acquire fame equal to the Red Emperor himself. HARDY LILIES

New Mid-Century Lily Hybrids

These lilies mark a new era in culture and variety. The following varieties offered have been selected, not only for their beauty, but for their great vigor and endurance under adverse conditions. They are hybrids of *L. tigrinum* and *L. umbellatum*. They grow as well or better than either parent. They are as colorful and spectacular as any lilies grown and are very easy to increase. One of them, "Enchantment," has been patented and may not be propagated commercially except by special license. A major and sensational advance has been achieved in the production of these hybrids. All of these lilies show bulbils in the axils of the leaves, if the flower or buds are removed early in the season. Enchantment will produce bulbils even if allowed to flower normally. All of them flower in July. Their blazing colors and their straight, stiff stems have made them stand out in their home garden. Their radical departure in form, habit and coloring have been noticed by every visitor. Be the first in your neighborhood to enjoy these exciting new lilies.
